Course Code	Course Title	Course Planner
CSE310	PROGRAMMING IN JAVA	16920::Ravi Kant Sahu

Course Outcomes :Through this course students should be able to

CO1 :: describe basic constructs of Java programming and apply them to solve the real-world problems.

CO2 :: illustrate the Object-oriented programming principles to write efficient and reusable codes.

CO3 :: examine the concept of inheritance to reuse and extend the features of existing class with access control.

CO4 :: discuss the applications of abstract classes, interfaces and Lambda expressions.

CO5 :: construct robust java applications to handle environment specific issues at run-time.

CO6 :: assess predefined java libraries and in-built data structures to use them for developing efficient java applications.
