24    <h2>Introduction</h2>
25    <p>The Moon is a barren, rocky world without air and water. It has dark lava plain on its surface. The Moon is filled
    wit craters. It has no light of its own. It gets its light from the Sun. The Moo keeps changing its shape as it moves
    round the Earth. It spins on its axis in 27.3 days stars were named after the Edwin Aldrin were the first ones to set
    their foot on the Moon on 21 July 1969 They reached the Moon in their space craft named Apollo II. The sun is a huge
    ball of gases. It has a diameter of 1,392,000 km. It is so huge that it can hold millions of planets inside it. The
    Sun is mainly made up of hydrogen and helium gas.</p>
