Q1.) Implementation of Visitor's counter by using any plugin

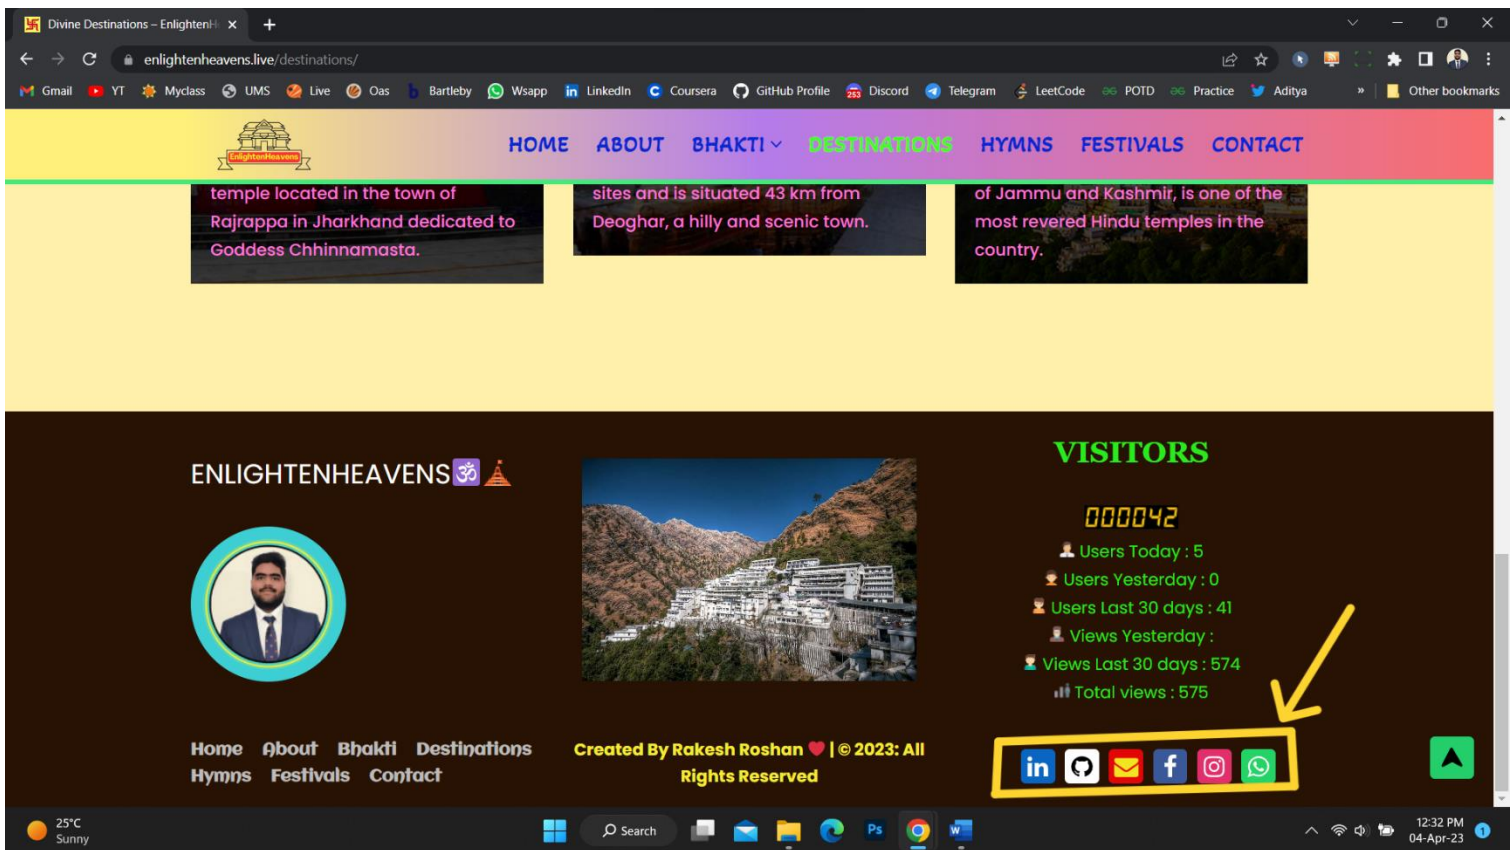

I have used WPS Visitor counter plugin and displayed all users and views in last 30 days, Today, and Yesterday.

The screenshot shows a web browser displaying the website 'enlightenheavens.live/destinations/'. The website has a yellow header with a logo and navigation links: HOME, ABOUT, BHAKTI, DESTINATIONS, HYMNS, FESTIVALS, and CONTACT. Below the header, there are three text boxes describing different destinations. At the bottom, there is a dark blue footer with a profile picture, a landscape image, and a 'VISITORS' section. The 'VISITORS' section is highlighted with a yellow box and an arrow, showing the following statistics:

VISITORS	
000042	
Users Today	: 5
Users Yesterday	: 0
Users Last 30 days	: 41
Views Yesterday	:
Views Last 30 days	: 574
Total views	: 575

The footer also includes the text 'ENLIGHTENHEAVENS', 'Created By Rakesh Roshan | © 2023: All Rights Reserved', and social media icons for LinkedIn, GitHub, Email, Facebook, Instagram, and WhatsApp. The browser's address bar shows the URL 'enlightenheavens.live/destinations/' and the page title 'Divine Destinations - Enlighten!'. The Windows taskbar at the bottom shows the date and time as '12:31 PM 04-Apr-23'.

## Q2.) Explain Follow Buttons with Example & also Implement the follow buttons?

Follow buttons are graphical user interface (GUI) elements that allow users to subscribe to or follow the updates of a particular account or page on a social media platform, website or application. When a user clicks the follow button, they are indicating their interest in receiving updates about the account or page or view the user GitHub or social profiles they like to see, and the platform will then deliver these updates to the user's feed or notifications.

Follow Buttons in WordPress allow visitors to subscribe to your website and receive notifications when new content is published. These buttons are a great way to build a community around your website and keep readers engaged.

For example, on LinkedIn, a follow button appears on each user's profile page, allowing other users to follow their LinkedIn profile. Similarly, on Instagram, a follow button appears on each user's profile page and on each of their posts, allowing other users to follow their updates.
